

AMENDMENT TO THE SPECIFICATION

Please amend the Abstract submitted with WO 01/02526, as follows.

 ~~Abstract: The present invention relates to detergent~~ Detergent compositions or components are formulated with ~~comprising~~ certain hydrophobically ~~hydrophibically~~ modified cellulosic materials, which ~~provides~~ provide protection of fabrics, whereof at least 80% or even at least 90% ~~has~~ have a particle size of below 1000 microns or even below 850 or even 710 microns. Selection of materials ~~material~~ of this particle size results in improved dispersability ~~disperaney~~ of the cellulosic material and imparts improved appearance and integrity benefits to fabrics and textiles laundered in washing solutions formed from such compositions.

A clean copy of the Abstract is presented herewith on a separate sheet. (Attached)
